

Town of Island Falls

Growing Into Modern Times

Walker Settlement Road

Finally, after a long winter, Walker Settlement Road is being repaved and ditched.

The project was temporarily delayed in order to remove what was believed to be a large section of granite under the road bed. Once the digging began, there was NO granite – there were 2 different kinds of soils, compacted gravel and loam that prevented proper drainage. The soils were removed and replaced.

Of course we will have to wait until next spring to see if the removal solved the problem. Until then, we can enjoy a smooth ride to the golf course.
